

Rasmussen College

Various Locations

For nearly twenty years, planning and design services have generated many renovation and new construction projects at various campuses providing a cohesive architectural identity. With campuses located throughout the Midwest and Florida, each project is inspired by local culture, environment and architecture. From urban to rural settings, or as unique as Caribbean or Native American influences, each have found a place among these distinct campus locations through the use of building materials and interior design elements.

The plan for each campus includes locating the public spaces—like computer labs, libraries, and student service centers—around the main entrance to campus. These spaces are designed to be interactive environments with bright colors, glass walls, and multiple seating arrangements used to foster group and individual study options as well as places for social or academic conversation. Public areas are located at the entry of each campus, with classrooms branching off into two wings to create a “V” shaped plan. The effective use of design elements provides a cohesive architectural identity for each campus while also showcasing each locale's unique character.
